**FIGURE 8-4.** The distribution of world epidemic influenza 1964 to 1975 in four major zones of latitude. In each zone the percentage of the zone's epidemic months is shown monthly. The epidemic months cluster around local midwinter in both temperature zones; in both tropical zones they show a transition, each approaching the distribution in its own temperature zone. See also Table 8.1 (data extracted from the *Weekly Epidemiological Record* of WHO; Hepe-Simpson,<sup>4</sup> p. 39, Fig. 2; reproduced with permission from *Epidemiology and Infection*).
